

Computer Organisation and Architecture

This textbook provides a perfect amalgam of the basics of computer architecture, intricacies of modern assembly languages and advanced concepts such as multiprocessor memory systems and I/O technologies. It shows the design of a processor from first principles including its instruction set, assembly-language specification, functional units, microprogrammed implementation and 5-stage pipeline. Computer Organisation and Architecture can serve as a textbook in both basic as well as advanced courses on computer architecture, systems programming, and microprocessor design. Additionally, it can also serve as a reference book for courses on digital electronics and communication.

Computer Organisation and Architecture

Smruti Ranjan Sarangi

Assistant Professor,
Dept. of Computer Science Engineering
Indian Institute of Technology, Delhi

Salient Features

- Balanced presentation of theoretical, qualitative and quantitative aspects of computer architecture
- Extensive coverage of the ARM and x86 assembly languages
- Design of a complete processor and its ISA from first principles
- Highly illustrative text with figures placed at relevant points for better understanding of concepts
- Extensive software support: Instruction set emulators, assembler, Logisim and VHDL design of the SimpleRisc processor
- **Pedagogy:**
 - Solved Examples: 180
 - Exercises: 250
 - Illustrations: 400

ONLINE LEARNING CENTER for the book

<http://www.mhhe.com/sarangi/coa>

For Students:

PowerPoint Slides
Case Studies and Projects
Software

- emuArm
- emuSimpleRisc
- SimpleRisc interpreter
- Logisim model of the SimpleRisc processor
- VHDL model of the SimpleRisc processor

For Instructors:

PowerPoint Slides
Solution Manual
